

# Tehama Angus Ranch

August 30, 2011

Friends and fellow breeders,

The 37<sup>th</sup> annual "Generations of Performance" Bull Sale is just a week away. Enclosed is the updated information on the 2011 sale bulls. As always, we want to provide you with all of the information available on each and every bull. The fall bull data will have the most adjustments with yearling weights and Epd's, ultrasound data and updated carcass Epd's, updated \$ values, frame score, and scrotal circumference (all adjusted to 365 days). The majority of the yearling and ultrasound data will be different than those printed in the catalog as they are recomputed using the actual ultrasound data and final yearling weights recorded on August 22 and August 24<sup>th</sup>, respectively for the fall bulls.

The data for the spring bulls includes their final weight as of August 29 – and all of the other pertinent data.

Embryo bulls are ratioed amongst their own contemporary group, this group is also split between registered recipis and unregistered recipis. Thus, the unregistered recipis progeny will have a 100 for growth ratios. All ultrasound data is calculated within each contemporary group.

We will be retaining a 33% semen interest and revenue sharing in all of the bulls, please see our catalog for details.

New this year, we have taken video footage of each and every bull and placed it on Tehamaangus.com and Superiorlivestock.com to help preview the offering ahead of time. The sale will be broadcasted on superiorlive.com for those unable to attend sale day. Please view the catalog for more details.

Please join us Thursday evening, September 8<sup>th</sup> at 6 p.m. for our annual Certified Angus Steak BBQ. Paul Dykstra, beef cattle specialist for Certified Angus Beef in Chappell, Nebraska, will be presenting an update on a variety of timely topics, from feedlot trends to the success of CAB. We look forward to seeing you at the BBQ and at the sale on Friday, September 9<sup>th</sup>.

Sincerely,

Kevin Borrer
